

## Project Zero Circular Economy Workshop and Webinar Services

Project Zero is an impactful initiative to bring and implement circular economy concepts to British Columbia.

In an equitable circular economy, resources and manufactured goods are designed to remain in the system through innovation, reuse and repair, redistribution, recondition, and recycling processes, all of which are powered by renewable energy. As a result, pollution and waste are eliminated. To build capacity and awareness of the circular economy and the opportunities that lie within it, Project Zero offers a variety of workshop and webinar services that can be tailored to your specific needs.

### Our workshops are designed for:

- Economic Development Organizations
- Local Government
- Industry Associations
- Corporations
